

IT Rack Drawer with Integrated Wire Management

OS-Rack Drawer

The OS-Rack-Drawer is OSSI's latest enclosure solution designed for facilities with limited wall space and IT room rack availability. The drawer is designed to fit in a typical 19in rack. It comes with adjustable back mounting rails which can be mounted in racks with 30in to 36in depths. The drawer is designed of 16ga steel for a very sturdy environment to mount your Access Control and I/O control equipment. The drawers are powder coated to protect them in any environment. It is designed with integrated wire management on back to protect your cables from damage when opened and closed while servicing your equipment. It's a great alternative to traditional wall enclosures when space is a premium.

Supports two MC-MLC-Cages for up to 56 doors of Access Control or one cage with supporting isolation equipment for detention control. A second can be added to control up to 112 outputs or 224 inputs, and supports up to 56 intercoms. All configurations with power and LTEA Lon to IP communication adapter.
